Re: WT Docket 11-65

Dear Chairman Genachowski and Commissioners,

Touched By An Angel Ministries is dedicated to inspiring and motivating special needs people by providing professional programs and services through qualified, caring personnel teaching Christian principles that will encourage the satisfaction of individual achievement. At our camp in rural Mississippi we welcome children with disabilities to visit us for a weekend or the full summer to ride horses, practice shooting, play games, or just have fun with other children their age.

Being situated in a rural part of the state, we are very aware of the issues that rural America is facing regarding communications and wireless connectivity. We are of the opinion that the proposed AT&T/T-Mobile merger will be beneficial for our camp and all rural parts of Mississippi. By joining forces and eventually expanding mobile broadband capabilities to over ninety-seven percent of the country, the new AT&T will drastically increase the use of mobile broadband as a valuable communications tool.

At Touched By An Angel Camp, we provide a whole new world of adventure and freedom for our campers. Without this opportunity, most of these disable children would live sheltered and very unsatisfying lives. In order for our camp to grow and succeed we need tools such as wireless broadband. Please approve this merger so groups like Touched By An Angel can survive.

Thank you,

A handwritten signature in black ink, appearing to read "Brian Albritton". The signature is fluid and cursive, with a large initial "B" and a long, sweeping underline.
